Particulars for off-plan purchases are intended as a guide only. Final finishes to the property may vary. Purchasers are advised to engage a solicitor to check the plans and specifications as laid out in their purchase contract with the developer.

DESCRIPTION

At the entrance to Ferney, between the historic town center and the Franco-Swiss border.

"Impulsion" is part of an ecological approach that aims to obtain several labels and certifications guaranteeing high-quality, environmentally-friendly and energy-efficient construction.

The project calls for the use of bio-sourced materials, such as wood, in the architectural design. The residence is connected to an existing district heating plant. Particular attention will be paid to the management of rainwater through the creation of a rain garden at the heart of the block, and to biodiversity through a rigorous selection of plant species.
